

ASTA CHECK SAMPLE PROGRAM

www.astaspice.org

A Waters Company

October 2018

The American Spice Trade Association (ASTA) invites you to register to participate in the 2019 ASTA Check Sample Program. We will once again feature a range of options and you are free to select those most relevant to the work done in your laboratory.

ERA moved the ASTA Check Sample Program to a new data platform for the 2018 program and feedback thus far is positive, with expanded reporting features and the ability for multiple analysts to enter data. Participants with questions on the platform are encouraged to contact ASTA for assistance.

ASTA has identified a Check Sample Task Force to review requirements for re-establishing the micro testing program to ensure that it meets participants' needs. Look for details in the coming year on the 2020 program.

For 2019 participating labs can select from the following options:

Red Pepper Chemistry - HPLC Heat, ASTA Color, Water Activity

Black Pepper Chemistry - Volatile Oil, Moisture, Piperine, Water Activity

Oregano Chemistry - Total Ash, Acid Insoluble Ash, Moisture, Volatile Oil, Water Activity

Samples will be sent quarterly and we will continue to bill a flat rate for shipping for each lab selecting up to one full set of the offerings. Shipping for more than one set will be billed based on the number of sets selected.

Quality Control samples will once again be offered at the same rate as the chemistry samples if you wish to use them to confirm analyses on a regular basis, investigate problems, confirm analyst training and perform other quality assurance and quality control functions. Quality Control samples are samples from a previous study and come with a Certificate of Analysis. Additional samples for each study may also be purchased if you wish to have additional people in your lab participate in the program. The upgraded platform support data entry for additional analysts to submit data.

We look forward to you continued participation in this program.

Sincerely,

Laura Shumow
Executive Director

Program Overview

ASTA Check Sample Program

The American Spice Trade Association will provide to its members and to other interested parties a cost effective means for the comparison and the evaluation of their capabilities with regard to both precision and accuracy. The program will maintain commitment to continuous evaluation of necessary and appropriate methods to meet the needs of its membership.

ASTA Program Description

The purpose of the ASTA Check Sample Program is to strengthen laboratory credibility and promote high levels of accuracy within and among laboratories using standard analytical test methods for spices and herbs. The methods, such as ASTA's Official Analytical Methods, provide a uniform way to measure results within and among laboratories.

The ASTA Check Sample Program is designed to evaluate spice laboratories for a common range of analyses and spices that are significant to the spice trade. The program allows individual laboratories to evaluate their performance and set goals for improvement and consistency in analyses.

ASTA check samples are prepared from materials donated by member companies. In order to ensure homogeneity of the samples, all samples are prepared from a single batch for each round of testing.

The ASTA program is administered on a quarterly basis with each laboratory receiving samples, instructions, and data reporting forms with each shipment. All of the studies are open for 30 days. Participants are encouraged to enter their data via a secure on-line data entry website. Online data entry is confirmed through automated emails or laboratories can print confirmations directly from the web site.

The ASTA Check Sample Program is open to both ASTA members and non-members worldwide. As an ASTA program, the usage of ASTA methods is required. Please refer to the ASTA website at www.astaspice.com.

Registration Form

Please return by December 31, 2018

Program Fee (4 shipments) (Please Check the samples you wish to receive)

Red Pepper Chemistry	<input type="checkbox"/> ASTA Member \$215	<input type="checkbox"/> ASTA Non-Member \$430
Black Pepper Chemistry	<input type="checkbox"/> ASTA Member \$215	<input type="checkbox"/> ASTA Non-Member \$430
Oregano Chemistry	<input type="checkbox"/> ASTA Member \$215	<input type="checkbox"/> ASTA Non-Member \$430

Quality Control Chemistry Samples ASTA Member \$215 ASTA Non-Member \$430

Additional Samples

Red pepper chemistry	<input type="checkbox"/> ASTA Member \$125	<input type="checkbox"/> ASTA Non-Member \$250
Black pepper chemistry	<input type="checkbox"/> ASTA Member \$125	<input type="checkbox"/> ASTA Non-Member \$250
Oregano chemistry	<input type="checkbox"/> ASTA Member \$125	<input type="checkbox"/> ASTA Non-Member \$250

Annual Shipping and Handling Fee (Please check one)

Note: shipping fees apply for ONE set of each. Each additional set requires a separate shipping fee.

International participants are responsible for all applicable duties, taxes and customers clearance. Please select your shipping preference of Federal Express or DHL.

____ Shipping Fee ---- United States \$140

Shipping Fee ---- **International - Select one:**

____ Federal Express \$460

____ DHL \$600
